SPP#42 EZ's Ribwarmer

On Page 2, in the paragraph titled 'Turn first corner (first half)', the 2nd set of numbers should read 32 (34, 36, 38), instead of 32 (34, 36, 48).

Please add the following Notes, where indicated:

On Page 2, after the paragraph beginning "Provisionally cast on...", add:

Note: Here is where you can lengthen the Ribwarmer, if wanted: simply knit more ridges before turning the first corner. Record the number of R you add and work them on the back before beginning the back shaping. See p4 for a Note on filling in a deep armhole.

On Page 2, after the first sentence of the paragraph beginning "Back Shaping:", add:

Note: As you knit up the back, reverse the shaping you did on the front: decrease one stitch at each armhole edge (2 sts in from edge) every 4th R; 4 (6, 4, 6) sts decreased at each edge.

On Page 4, after the paragraph beginning "Work straight until...", add:

Note on filling in a deep armhole: If you added length to a Ribwarmer with side panels, to fill in the resulting deeper armhole, you can work a saddle up each side after the fact. Pick up 1 stitch for each ridge worked in the side panel (which is letter E in Fig 1, p2). Work back and forth on those sts, joining the last stitch of each row to either the front or back selvedge in the manner described for Meg's Sew-As-You-Go (above). Stop when you have filled in as much armhole as you wish; cast off or leave the raw sts for the armhole finishing.
