

## SPP #19 (The Tomten)

### **Correction #1**

Omission from 1<sup>st</sup> printing only (subsequent printings have directions on page 6 under Sleeve-Cap Shaping):

#### *Tomten Sleeve-Cap Shaping*

This technique is visible on the cover jacket. It makes a better fit when the sleeve is inset quite far into the body.

On page 3, under **Sleeves**: following, "Slide underarm sts-on-a-thread onto circular needle, but do not knit them. Turn."

Work to center-top:

k 5, wrap, turn

k 10, wrap, turn

k 15, wrap, turn

k 20, wrap, turn

Continue adding 5 more sts at the end of each row to k 40, wrap, turn.

Depending upon your size and gauge, work to more, or fewer than k 40.

Continue **Sleeves** as written.

### **Correction #2**

Page 5 under **Collar or Hood**, for the 30 inch size, the number should be 76, instead of 72.

Page 5 under **Sleeves**, for the 30 inch size, the pick-up number should be 72, instead of 68.
